Some of you asked for details on my 20 Foot End-Fed-Wire Antenna, and how I feed it. These questions have been answered on this reflector, but it was a long time back. For those who would like details on my 20-Foot Wire, and how I feed it, Here is an article that I wrote a couple of years ago to answer these questions:

Full Details on my 20 foot end fed wire Antenna setup may be read or downloaded by clicking here:

[20 FOOT END FED ANTENNA DETAILS](#)

It has now been 4 years that my only hf rig is the IC-705, and my only antenna is the 20-Foot end fed wire.

Using this set-up, as of today, from my condo in the city, I have completed:

18,380 QRP contacts with 5 Watts or less, in 145 Countries.

14,878 QRPp contacts with ½ Watt or less, in 82 Countries.

Overall, well over 80% of my contacts are with ½ Watt, and well over 90% are CW.

I think any other questions about my antenna are answered in the article noted above.

If you still have any questions, please ask away!

-73-

John N6HI

100% QRP Op for the last 25+ years of my 60 years hamming!
