Subject: REMINDER: MDC Section Winlink Check-in Exercise, Tues FEB 13
2024

Please remember to send your monthly MDC Section Winlink Check-in message(s) on Tuesday, FEB 13 2024. Participants are highly encouraged to gain experience using the Winlink Check In template found in MAPPING-GIS FORMS. Alternatively, participants may submit a standard text message.* This exercise occurs on the second Tuesday of each month.

For help with the Winlink Check-in template, which is used in inter-agency drills and exercises, check out the following link:
https://srcares.files.wordpress.com/2021/03/srcares-201_winlinkcheckin-1.pdf

Place the following information in the Comments section of the Check-in form, or in a text message, using comma separated format: Callsign, First-name, City or Town, County, State, Session Type. For example:
KD3JA, James, Lanham, Prince George's, MD, Vara HF.

The following is a list of the Winlink session types that may be used: 1. Telnet, 2. Packet, 3. Ardop, 4. Vara HF, 5. Vara FM, and 6. Vara HF Radio-Only. Multiple check-ins using different session types is encouraged. There is no need to include 'Winlink' in the session type, as all of the specified session types are Winlink.

Messages are to be sent to tactical callsign MDCWINLINK-1, except in the case of VARA HF Radio-Only which must be addressed to N3XL. (Tactical callsigns will not work for Radio-Only nor peer-to-peer (P2P) messages).

* For your location pin to show up on the map, when using a text message, the location must be in the message header. Regardless of your submission method, it is highly recommended that in your Winlink 'Preferences' settings that in the 'Message sending options', the check box for 'Include your location in message headers' is checked.

73,

Bill N3XL, MDCWINLINK-1
