

ARRL Field Day 2023

OPEN TO THE PUBLIC!

Come learn about and experience ham radio!

Saturday June 24th 9am - 6pm
FBC Fire Training Field
260 Clay St.
Richmond, TX 77468

- Have you ever wondered what you would do if the power went out? How would you be able to communicate with family and friends?
- Are you looking to learn about applied physics, electronics, communication, and much more?
- Do you find the idea of off-grid communication with others around the country and globe fascinating?
- Does the concept of using radio technology to assist your community intrigue you?
- How about using radio to communicate digital information thousands of miles without the internet?
- Are you looking for a new hobby?
- Do you want to spend a day learning something new?

If the answer to any of these questions is YES, then we have the event for you!

We are proud to bring to you Field Day 2023, where licensed amateur radio operators will be available to help you get your voice on the air while learning more about the art and science of radio. Come learn about the community service aspect of ham radio with the local ham radio operators who volunteer for emergency services and in local events. Demonstrations and informational material will be available.

You can find more information about the event at BVARC.ORG
