## QSL SUPPORT

Members of the South Jersey DX Association all have a common interest in DXing and/or Contesting. Our current activities include QSL support for major DXpeditions.

We have provided support for the following DXpeditions since 2006: 3Y0X, VU7RG/VU7MY, K5D, HK0NA, TX5K, FT5ZM, K1N, VP8SGI/VP8STI. Many other smaller operations as well.

## CONTEST ACTIVITIES

We have several group contest activities each year, however our primary event is entering the CQWW 160 SSB Contest from our club station in West Creek, NJ. The 160 antenna farm is shared with the W2GD 160 CW Contest Team.

### Club Station N2CW

Gary Medford Memorial Station

An ongoing project is the improvement of our club station. We have four 65' towers available to us. The main transmit "wire" 160 antenna is supported on the 300 foot broadcast tower used by our host WYRS -FM. Six full sized beverage antennas are used for receive. Our goal is to be able to cover all bands and modes with quality antennas and equipment and make improvements as we are able. We currently have all regular HF bands in operation 160-10. VHF/UHF is planned. WARC band antennas are availa-

## MEETINGS

Meetings are held at the WYRS West Creek site at the end of Murphy Drive on the 4th Tuesday of each month at 7:30 PM.

SJDXA strongly encourages our members to join and support their local general purpose Amateur Radio Club.

Aerial view of the West Creek site by KA2PFL

WYRS provides space for our club station and meetings.
