

Dear radio friends,

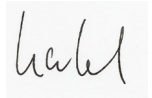

on 19/20.06.1914 the inauguration of the overseas transmitter Eilvese (callsign "OUI") at Lake Steinhude took place. A telegram from Kaiser Wilhelm to President Wilson (USA) was transmitted. The station in the USA was in Tuckerton (callsign "WSC").

The DARC Ortsverband Steinhuder Meer will be active on HF on the weekend 19/20 June 2021 with the new callsign **DL0OUI**. We look forward to many contacts to the United States of America. **With our activity we would like to commemorate the technical achievements of Prof. Goldschmidt**, who developed transmitter technology on both sides of the Atlantic.

At 16:00 UTC on 06/19/2021 we will call "**CQ Tuckerton / CQ NJ**" on the 20m band and would be very happy to have as many transatlantic connections as possible, we have attached all other times and frequencies.

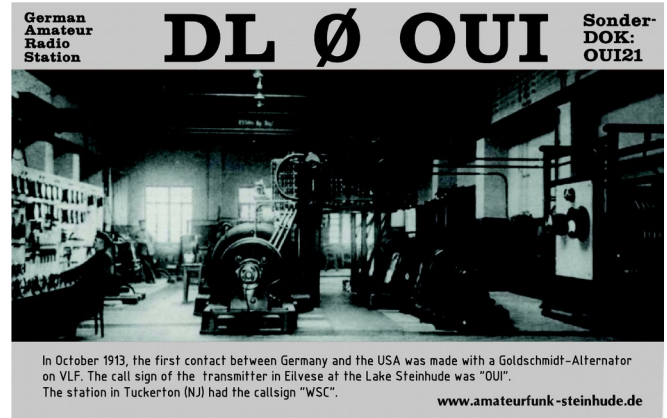

Radio amateurs - especially those without an HF station - can call us all weekend via Echolink (DB0STM).

vy 73 - stay well

Henrik Bartels, DL6OCH

Ass. Chairman DARC OV H35 Steinhuder Meer
