Office of Emergency Communications / Interoperable Communications Technical Assistance Program

TRAINING ANNOUNCEMENT

TRG-AUXCOMM: Auxiliary Communications Workshop

Description:

This class is designed for those auxiliary emergency communicators and groups who volunteer to provide backup emergency radio communications support to public safety agencies. Typically, this includes amateur radio and Radio Emergency Associated Communications Team (REACT) communicators, but may include other volunteer emergency communicators.

Volunteer emergency communications operators/groups, using amateur radio, have been providing backup communications to public safety for nearly 100 years. Event planners, public safety officials, and emergency managers at all levels of government utilize their services. Often, amateur radio services have been used when other forms of communications have failed or have been disrupted. Today, nearly all the states/territories have incorporated some level of participation by amateur radio auxiliary communication operators into their TICPs and SCIPs.

This course focuses on auxiliary communications interoperability, the relationship between the COML and the volunteer, emergency operations center (EOC) etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, and emergency communications deployment. It is intended to supplement and standardize an operator's experience and knowledge of emergency amateur radio communications in a public safety context.

To be held:

October 24-25, 2015 from 8am to 6pm

Middlesex County Fire Academy

1001 Academy Drive, Sayreville, NJ 08872

Class is limited to 30 Students

Application is attached
