All Week	Camp	0	146.460 simplex	

Weather	Sandusky	21	162.400	
	Toledo	25	162.500	
	Carey	26	162.525	

MEDICAL - Highest priority, squad needed/rider down
PRIORITY - Urgent, but not life threatening
INFORMATION - Have info related to current traffic

If you cannot reach a listed repeater, try transmitting on the repeater output frequency (use reverse function) and ask anyone responding to relay your traffic to net control station.
Should repeater failure occur where we need to use simplex communication, we will use the camp simplex frequency channel 0 (146.46)
Note: PL tones will be disabled on some of our repeaters, but are being supplied here in case we need to go back to them due to interference. If you have them programmed in, your radio will open the repeater either way.
